Advice for firefighters

DO NOT fight fire when fire reaches explosives.

Protective equipment and precautions for firefight. Wear a self-contained breathing apparatus and chemical protective clothing ers

Additional information

Do not allow run-off from fire-fighting to enter drains or water courses.

Do not inhale explosion and combustion gases.

Use caution when applying carbon dioxide in confined spaces. Carbon dioxide can displace oxygen. Use water spray/stream to protect personnel and to cool endangered containers. In case of fire: Evacuate area.

SECTION 6: ACCIDENTAL RELEASE

| | |
|----------------------------|--|
| Personal Precautions: | In case of major fire and large quantities: Remove persons to safety. |
| Environmental Precautions: | Discharge into the environment must be avoided. |
| Method of Containment: | Small Spill: Dilute with water and mop up, or absorb with an inert dry material and place in an appropriate waste disposal container. Finish cleaning by spreading water on the contaminated surface and dispose of according to local and regional authority requirements. |
| | Large Spill: Stop leak if without risk. Absorb with an inert material and put the spilled material in an appropriate waste disposal. Do not touch spilled material. |
| Method for Clean-Up: | Ventilate area of spill or leak. Sweep or scrap up and containerize in approved chemical waste container. Wash spill area with water. |

SECTION 7: HANDLING AND STORAGE

| | |
|-----------|---|
| Handling: | All work processes must always be designed so that the following is as low as possible: Inhalation skin contact Eye contact Use extractor hood (laboratory). If handled uncovered, arrangements with local exhaust ventilation have to be used. If local exhaust ventilation is not possible or not sufficient, the entire working area must be ventilated by technical means |
| Storage: | Recommended storage temperature: no data available Keep container tightly closed and in a well-ventilated place. Keep/Store only in original container. |

| Personal Protective Equipment (PPE) | Wear suitable protective clothing. When handling with chemical substances, protective clothing must be worn. |
| Eye/Face Protection: | Eye glasses with side protection |
| Skin Protection: | Wear suitable gloves. When handling with chemical substances, protective gloves must be worn. In the case of wanting to use the gloves again, clean them before taking off and air them well. Check leak tightness/impermeability prior to use. |
| Respiratory Protection | Respiratory protection necessary at: aerosol or mist formation If exposure limits are exceeded or irritation is experienced, NIOSH approved respiratory protection should be worn. |
| General Hygiene Considerations: | Wash hands before breaks and after work. Avoid contact with eyes and skin. When using do not eat, drink or smoke. Provide eye shower and label its location conspicuously. |
